Subject and title index 1974

Plastics Engineering, Volume 30

A

1. ABS

A three-in-one thermoforming machine, B. Procter, July, p. 26
How to dry ABS pellets, L. W. Fritch, Jr., September, p. 25
Engineering resins primer, PE Staff, December, p. 17

2. Acetals

An in-depth look at molded parts, E. S. Clark, March, p. 73
Engineering resins primer, PE Staff, December, p. 17

3. Additives

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Softening up PVC by design, M. Batiuk, April, p. 54
Mineral oil as a plastics additive, R. K. Rhodes, May, p. 61
Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Ampthor, June, p. 41
Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57
Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41

4. Aging

Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

5. Annual Technical Conference

32nd ANTEC advance program, March, p. 41
SPE's 32nd ANTEC, PE Staff, April, p. 27
Highlights of ANTEC '74, July, p. 44

6. Applications

Engineering resins primer, PE Staff, December, p. 17

7. Asbestos

A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32

8. Automation

Process parameter control: the key to optimization, J. W. Mann, January, p. 25
Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 20
Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
Update your controls with a computer, T. Inslee, August, p. 40

B

9. Blow Molding

Trends in blow molding and related packaging, Newark Section, August, p. 83
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40

C

10. Calendering

Can PVC calendering remain an art? S. E. Perlberg, February, p. 29

11. Coatings

Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

12. Colorants

Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
Coloring of plastics VIII, Cleveland Section, August, p. 80

13. Compounding

The art of formulating plastisols, G. R. Dietz, April, p. 47
Plastics processing systems, R. S. Hallas, June, p. 21
Powder coating comes down to earth, F. Conway, September, p. 18
Compounding the tough ones?, R. L. Adams, October, p. 35

14. Containers

A three-in-one thermoforming machine, B. Procter, July, p. 26
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixwell, C. L. Loney, and P. W. Tidwell, November, p. 40

15. Cooling

Lock impact strength into PVC parts, M. Labovitz, October, p. 53
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36

16. Copolymers

Controlled stretching upgrades EVA films, L. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

17. Creep

A guide to better testing of plastics, M. N. Riddell, April, p. 71

18. Crosslinking

Compounding the tough ones?, R. L. Adams, October, p. 35

19. Crystallinity

An in-depth look at molded parts, E. S. Clark, March, p. 73
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

D

20. Degradation

Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

21. Density

Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57

22. Design

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28
Injection molding 1974, Chicago Section, January, p. 56
Multilayer film from a single die, W. J. Schrenk, March, p. 65
Softening up PVC by design, M. Batiuk, April, p. 54
A new twist in mixing extruders, B. Maxwell, May, p. 40
1974 Design engineering show and conference, Plastics Engineering Staff, May, p. 52
Control melt temperature with die design, W. Kurzbuch, August, p. 43
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
What every molder of PMRN should know, S. R. Melvin, October, p. 28
Planning hot-manifold systems, L. Temesvary, December, p. 46
What's new in melt filters, H. M. Kennard, December, p. 59

23. Drying

How to dry ABS pellets, L. W. Fritch, Jr., September, p. 25

E

24. Ecology

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

25. Economics

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
Gas and oil from coal: a viable alternative, I. Skeist, February, p. 18
Structural foam housings for office machines, R. Rager, February, p. 25
Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Molds that cool it, A. Prasad, June, p. 36
How to start your own plastics-processing plant, D. M. Fay, June, p. 53

Subject and title index 1974

Plastics Engineering, Volume 30

A

1. ABS

A three-in-one thermoforming machine, B. Procter, July, p. 26
How to dry ABS pellets, L. W. Fritch, Jr., September, p. 25
Engineering resins primer, PE Staff, December, p. 17

2. Acetals

An in-depth look at molded parts, E. S. Clark, March, p. 73
Engineering resins primer, PE Staff, December, p. 17

3. Additives

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Softening up PVC by design, M. Batiuk, April, p. 54
Mineral oil as a plastics additive, R. K. Rhodes, May, p. 61
Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Ampthor, June, p. 41
Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57
Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41

4. Aging

Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

5. Annual Technical Conference

32nd ANTEC advance program, March, p. 41
SPE's 32nd ANTEC, PE Staff, April, p. 27
Highlights of ANTEC '74, July, p. 44

6. Applications

Engineering resins primer, PE Staff, December, p. 17

7. Asbestos

A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32

8. Automation

Process parameter control: the key to optimization, J. W. Mann, January, p. 25
Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 20
Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
Update your controls with a computer, T. Inslee, August, p. 40

B

9. Blow Molding

Trends in blow molding and related packaging, Newark Section, August, p. 83
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40

C

10. Calendering

Can PVC calendering remain an art? S. E. Perlberg, February, p. 29

11. Coatings

Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

12. Colorants

Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
Coloring of plastics VIII, Cleveland Section, August, p. 80

13. Compounding

The art of formulating plastisols, G. R. Dietz, April, p. 47
Plastics processing systems, R. S. Hallas, June, p. 21
Powder coating comes down to earth, F. Conway, September, p. 18
Compounding the tough ones?, R. L. Adams, October, p. 35

14. Containers

A three-in-one thermoforming machine, B. Procter, July, p. 26
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixwell, C. L. Loney, and P. W. Tidwell, November, p. 40

15. Cooling

Lock impact strength into PVC parts, M. Labovitz, October, p. 53
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36

16. Copolymers

Controlled stretching upgrades EVA films, L. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

17. Creep

A guide to better testing of plastics, M. N. Riddell, April, p. 71

18. Crosslinking

Compounding the tough ones?, R. L. Adams, October, p. 35

19. Crystallinity

An in-depth look at molded parts, E. S. Clark, March, p. 73
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

D

20. Degradation

Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

21. Density

Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57

22. Design

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28
Injection molding 1974, Chicago Section, January, p. 56
Multilayer film from a single die, W. J. Schrenk, March, p. 65
Softening up PVC by design, M. Batiuk, April, p. 54
A new twist in mixing extruders, B. Maxwell, May, p. 40
1974 Design engineering show and conference, Plastics Engineering Staff, May, p. 52
Control melt temperature with die design, W. Kurzbuch, August, p. 43
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
What every molder of PMRN should know, S. R. Melvin, October, p. 28
Planning hot-manifold systems, L. Temesvary, December, p. 46
What's new in melt filters, H. M. Kennard, December, p. 59

23. Drying

How to dry ABS pellets, L. W. Fritch, Jr., September, p. 25

E

24. Ecology

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

25. Economics

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
Gas and oil from coal: a viable alternative, I. Skeist, February, p. 18
Structural foam housings for office machines, R. Rager, February, p. 25
Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Molds that cool it, A. Prasad, June, p. 36
How to start your own plastics-processing plant, D. M. Fay, June, p. 53

Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Effective quality control for the plastics industry, Ontario Section, August, p. 82
Managing a fast-growing business, M. Benezra, September, p. 35
Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40
Quality engineering and value engineering—the two need not be at odds, A. van den Brekel, November, p. 31

26. Education

Lesson plan for plastics courses, July, p. 47
Practical plastics programs for colleges, R. Deanin, December, p. 55

27. Elastomers

"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41
Powdered nitrile rubber—A versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

28. Electrical Properties

Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48

29. Embossing

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34

30. Encapsulation

Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34

31. Energy

Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48

32. Engineering

Quality engineering and value engineering—the two need not be at odds, A. van den Brekel, November, p. 31

33. Engineering Resins

Engineering resins primer, PE Staff, December, p. 17

34. Epoxy

Engineering resins primer, PE Staff, December, p. 17

35. Extruders

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28
Setting up a PS foam sheet line, D. A. Knaus and F. H. Collins, February, p. 34
Vertical extruders with a difference, A. L. Fitch, May, p. 28
Tackle rigid PVC with twin screws, W. Peek, July, p. 23
Mix better—and faster—in the extruder, K. Murakami, December, p. 51

36. Extrusion

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28
The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
Recent advances in extrusion technology, Newark Section, January, p. 55
Setting up a PS foam sheet line, D. A. Knaus and F. H. Collins, February, p. 34
Controlled stretching upgrades EVA films, I. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
Multilayer film from a single die, W. J. Schrenk, March, p. 65
SPE's 32nd ANTEC, PE Staff, April, p. 27
Softening up PVC by design, M. Batiuk, April, p. 54
Vertical extruders with a difference, A. L. Fitch, May, p. 28
A new twist in mixing extruders, B. Maxwell, May, p. 40
Plastics processing systems, R. S. Hallas, June, p. 21
Put melt rheology to work in your extruder, R. C. Kowalski, June, p. 47
Tackle rigid PVC with twin screws, W. Peek, July, p. 23
Control melt temperature with die design, W. Kurzbuch, August, p. 43
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62
Compounding the tough ones?, R. L. Adams, October, p. 35
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40
Mix better—and faster—in the extruder, K. Murakami, December, p. 51

F

37. Fabrication

Cutting resins down to size, J. K. L. Bajaj, January, p. 18

38. Fibers

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62

39. Fillers

The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32

40. Film

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
Can PVC calendering remain an art? S. E. Perlberg, February, p. 29
Controlled stretching upgrades EVA films, I. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
Multilayer film from a single die, W. J. Schrenk, March, p. 65

41. Filters

What's new in melt filters, H. M. Kennard, December, p. 59

42. Filtration

What's new in melt filters, H. M. Kennard, December, p. 59

43. Flammability

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57

44. Flexural Properties

A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37

45. Fluid Bed Coating

Powder coating comes down to earth, F. Conway, September, p. 18

46. Fluorocarbons

A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48
Engineering resins primer, PE Staff, December, p. 17

47. Foam

Structural foam housings for office machines, R. Rager, February, p. 25
Setting up a PS foam sheet line, D. A. Knaus and F. H. Collins, February, p. 34
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62

48. Fracture

Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40

H

49. Heat Transfer

Molds that cool it, A. Prasad, June, p. 36
Control melt temperature with die design, W. Kurzbuch, August, p. 43

50. Housings

Structural foam housings for office machines, R. Rager, February, p. 25

I

51. Impact Properties

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Lock impact strength into PVC parts, M. Labovitz, October, p. 53

52. Injection Molding

Process parameter control: the key to optimization, J. W. Mann, January, p. 25
Injection molding 1974, Chicago Section, January, p. 56
Structural foam housings for office machines, R. Rager, February, p. 25
Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
An in-depth look at molded parts, E. S. Clark, March, p. 73
Thermoset injection molding has come of age, S. H. Bauer, April, p. 64
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
Plastics processing systems, R. S. Hallas, June, p. 21
Molds that cool it, A. Prasad, June, p. 36
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37

Update your controls with a computer, T. Inslee, August, p. 40
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
What every molder of PMRN should know, S. R. Melvin, October, p. 28
A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36

L

53. Laminating

Multilayer film from a single die, W. J. Schrenk, March, p. 65

M

54. Machinery

Cutting resins down to size, J. K. L. Bajaj, January, p. 18
Process parameter control: the key to optimization, J. W. Mann, January, p. 25
Recent advances in extrusion technology, Newark Section, January, p. 55
Structural foam housings for office machines, R. Rager, February, p. 25
Setting up a PS foam sheet line, D. A. Knaus and F. H. Collins, February, p. 34
Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
Thermoset injection molding has come of age, S. H. Bauer, April, p. 64
GR polyester moves up to injection molding, F. Conway, May, p. 22
Vertical extruders with a difference, A. L. Fitch, May, p. 28
A new twist in mixing extruders, B. Maxwell, May, p. 40
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
Tackle rigid PVC with twin screws, W. Peek, July, p. 23
A three-in-one thermoforming machine, B. Procter, July, p. 26
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37
Control melt temperature with die design, W. Kurzbuch, August, p. 43
Planning hot-manifold systems, L. Temesvary, December, p. 46

55. Magnesium

Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Amphor, June, p. 41

56. Markets

How to start your own plastics-processing plant, D. M. Fay, June, p. 53
Managing a fast-growing business, M. Benezra, September, p. 35
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

57. Mathematical Model

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28

58. Mechanical Properties

An in-depth look at molded parts, E. S. Clark, March, p. 73
Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

59. Measurement System

Inching towards metrication, F. Conway, July, p. 16.

60. Metrication

Inching towards metrication, F. Conway, July, p. 16

61. Mineral Oil

Mineral oil as a plastics additive, R. K. Rhodes, May, p. 61

62. Mixing

Mix better—and faster—in the extruder, K. Murakami, December, p. 51

63. Modulus

Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40

64. Moisture

How to dry ABS pellets, L. W. Fritch, Jr., September, p. 25.

65. Molding

Thermosets in the mid-70's, Philadelphia Section, January, p. 54
SPE's 32nd ANTEC, PE Staff, April, p. 27
Plastics processing systems, R. S. Hallas, June, p. 21
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16
Lock impact strength into PVC parts, M. Labovitz, October, p. 53
Planning hot-manifold systems, L. Temesvary, December, p. 46

66. Monomers

VCM—The processor's perspective, Palisades Section, September, p. 55

67. Morphology

An in-depth look at molded parts, E. S. Clark, March, p. 73

68. National Technical Conference

Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

69. Nylon

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62
What every molder of PMRN should know, S. R. Melvin, October, p. 28
Engineering resins primer, PE Staff, December, p. 17

O

70. Orientation

Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

P

71. Packaging

Controlled stretching upgrades EVA films, I. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59
Trends in blow molding and related packaging, Newark Section, August, p. 83

72. Performance

A guide to better testing of plastics, M. N. Riddell, April, p. 71
What's new in melt filters, H. M. Kennard, December, p. 59

73. Petrochemicals

Gas and oil from coal: a viable alternative, I. Skeist, February, p. 18
Squeezing through the resin pinch, E. Bolger, April, p. 61

74. Phenylene Sulfide

Engineering resins primer, PE Staff, December, p. 17

75. Phosphites

Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59

76. Physical Properties

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34
Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
The art of formulating plastisols, G. R. Dietz, April, p. 47
A guide to better testing of plastics, M. N. Riddell, April, p. 71
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak and M. D. Bertolucci, July, p. 32
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37
Fibrous plastic webs without spinning, M. G. Schirmer, August, p. 62
Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41
What every molder of PMRN should know, S. R. Melvin, October, p. 28
A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48
Powdered nitrile rubber—A versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26
Engineering resins primer, PE Staff, December, p. 17

77. Plasticizers

The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
Softening up PVC by design, M. Batiuk, April, p. 54
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

Powdered nitrile rubber—a versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

78. Plastics

Cutting resins down to size, J. K. L. Bajaj, January, p. 18
Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Lesson plan for plastics courses, July, p. 47
Decision makers weigh the future of the plastics industry, August, p. 30
Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48
Coloring of plastics VIII, Cleveland Section, August, p. 80
Decorating plastics, Tri-State Section, August, p. 81
NATEC program, September, p. 50
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16
Practical plastics programs for colleges, R. Deanin, December, p. 55

79. Plastisols

The art of formulating plastisols, G. R. Dietz, April, p. 47

80. Polybutene

Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62

81. Polycarbonate

Structural foam housings for office machines, R. Rager, February, p. 25
Engineering resins primer, PE Staff, December, p. 17

82. Polyesters

Thermosets in the mid-70's, Philadelphia Section, January, p. 54
Structural foam housings for office machines, R. Rager, February, p. 25
GR polyester moves up to injection molding, F. Conway, May, p. 22
Engineering resins primer, PE Staff, December, p. 17

83. Polyethylene

Barrier screw design holds no obstacles for computers, B. H. Maddock, January, p. 28
Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
Structural foam housings for office machines, R. Rager, February, p. 25
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
Compounding the tough ones?, R. L. Adams, October, p. 35
Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40

84. Polyimides

Engineering resins primer, PE Staff, December, p. 17

85. Polymethylmethacrylate

A guide to better testing of plastics, M. N. Riddell, April, p. 71

86. Polyolefins

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37
SPE's 32nd ANTEC, PE Staff, April, p. 27
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32

87. Polyphenylene oxide

Structural foam housings for office machines, R. Rager, February, p. 25
Engineering resins primer, PE Staff, December, p. 17

88. Polypropylene

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli. January, p. 37
Structural foam housings for office machines, R. Rager, February, p. 25
Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak and M. D. Bertolucci, July, p. 32
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62
Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30

89. Polystyrene

Structural foam housings for office machines, R. Rager, February, p. 25
Setting up a PS foam sheet line, D. A. Knaus and F. H. Collins, February, p. 34
Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
A three-in-one thermoforming machine, B. Procter, July, p. 26
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37

90. Polysulfone

Engineering resins primer, PE Staff, December, p. 17

91. Polyvinyl chloride

Can PVC calendering remain an art?, S. E. Perlberg, February, p. 29
Softening up PVC by design, M. Batiuk, April, p. 54
A guide to better testing of plastics, M. N. Riddell, April, p. 71
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33
Less smoke from PVC, J. J. Kracklauer and C. J. Sparkes, June, p. 57
Tackle rigid PVC with twin screws, W. Peek, July, p. 23
Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41
VCM—The processor's perspective, Palisades Section, September, p. 55
Lock impact strength into PVC parts, M. Labovitz, October, p. 53
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20
Powdered nitrile rubber—a versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

92. Porosity

The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37

93. Powder Coating

Powder coating comes down to earth, F. Conway, September, p. 18

94. Processing

Emboss and stretch: a new way to fibers from film, C. N. Main and J. H. Choufoer, January, p. 34
Recent advances in extrusion technology, Newark Section, January, p. 55
Injection molding 1974, Chicago Section, January, p. 56
Gas and oil from coal: a viable alternative, I. Skeist, February, p. 18
Multilayer film from a single die, W. J. Schrenk, March, p. 65
The art of formulating plastisols, G. R. Dietz, April, p. 47
Softening up PVC by design, M. Batiuk, April, p. 54
Squeezing through the resin pinch, E. Bolger, April, p. 61
Thermoset injection molding has come of age, S. H. Bauer, April, p. 64
GR polyester moves up to injection molding, F. Conway, May, p. 22
A new twist in mixing extruders, B. Maxwell, May, p. 40
Mineral oil as a plastics additive, R. K. Rhodes, May, p. 61
Plastics processing systems, R. S. Hallas, June, p. 21
Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Ampthor, June, p. 41
How to start your own plastics-processing plant, D. M. Fay, June, p. 53
A three-in-one thermoforming machine, B. Procter, July, p. 26
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16
What every molder of PMRN should know, S. R. Melvin, October, p. 28
Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40
A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40

95. Production

Gas and oil from coal: a viable alternative, I. Skeist, February, p. 18
Plastics, energy, and ecology—a harmonious triad, J. E. Guillet, August, p. 48

96. Pressure Dependence

Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36
Mix better—and faster—in the extruder, K. Murakami, December, p. 51

97. Pyrolysis

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17

Q

98. Quality Control

Effective quality control for the plastics industry, Ontario Section, August, p. 82
Quality engineering and value engineering—the two need not be at odds, A. van den Brekel, November, p. 31
Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40

R

99. Recycling

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17

100. Regional Technical Conference

Thermosets in the mid-70's, Philadelphia Section, January, p. 54
Recent advances in extrusion technology, Newark Section, January, p. 55
Injection molding 1974, Chicago Section, January, p. 56
Coloring of plastics VIII, Cleveland Section, August, p. 80
Decorating plastics, Tri-State Section, August, p. 81
Effective quality control for the plastics industry, Ontario Section, August, p. 82
Trends in blow molding and related packaging, Newark Section, August, p. 83
VCM—The processor's perspective, Palisades Section, September, p. 55

101. Reinforced Plastics

A guide to better testing of plastics, M. N. Riddell, April, p. 71
GR polyester moves up to injection molding, F. Conway, May, p. 22
Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Ampthor, June, p. 41
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32
Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30
What every molder of PMRN should know, S. R. Melvin, October, p. 28

102. Rheological Properties

Put melt rheology to work in your extruder, R. C. Kowalski, June, p. 47

103. Rheology

Put melt rheology to work in your extruder, R. C. Kowalski, June, p. 47
Powdered nitrile rubber—a versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

104. Roofing

Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

105. Rubber

Powdered nitrile rubber—a versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

S

106. Safety

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

107. Shear

Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33

108. Sheet

Can PVC calendering remain an art? S. E. Perlberg, February, p. 29
Multilayer film from a single die, W. J. Schrenk, March, p. 65
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62
Oriented rigid PVC may open the door to U.S. markets for roofing, A. G. Sellier, November, p. 20

109. Silicones

Why silicone encapsulants now? R. C. Antonen and F. L. Menko, March, p. 34

110. Size Reduction

Cutting resins down to size, J. K. L. Bajaj, January, p. 18

111. Society

32nd ANTEC advance program, March, p. 41
SPE's 32nd ANTEC, PE Staff, April, p. 27
International officers 1974, April, p. 44
1974 Design engineering show and conference, Plastics Engineering Staff, May, p. 52
1973 SPE annual report, May, p. 53
Highlights of ANTEC '74, July, p. 44
1974 People Directory, August, p. 93
NATEC program, September, p. 50
Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

112. Spectral Analysis

Get more product uniformity in extrusion, R. H. Reinhard, A. R. Crixell, C. L. Loney, and P. W. Tidwell, November, p. 40

113. Spray Coating

Powder coating comes down to earth, F. Conway, September, p. 18

114. Stability

Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30

115. Stabilizers

Stabilizer for rigid PVC with FDA clearance, O. S. Kauder and L. R. Brecker, August, p. 59

116. Standards

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17
Inching towards metrication, F. Conway, July, p. 16

117. Stress-Strain

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Forge HDPE parts right from pellets, K. M. Kulkarni, L. J. Broutman, S. Kalpakjian, and D. Emery, October, p. 40

118. Stretching

Controlled stretching upgrades EVA films, I. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39

119. Suppliers

Plastics processing systems, R. S. Hallas, June, p. 21
Engineering resins primer, PE Staff, December, p. 17

120. Surface Transportation

Plastics in surface transportation, 1974 NATEC program, conference and technical display, October, p. 16

121. Synthetic Paper

The structure of plastic papers, J. R. Quick, C. J. Benning, and J. P. Tonelli, January, p. 37

T

122. Talc

Choosing the right talc for reinforcing PP, T. P. Bragg and M. D. Held, September, p. 30

123. Temperature Dependence

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Consider special screws for injection machines, C. S. Gutermuth, Jr. and T. G. Bishop, May, p. 46
Molds that cool it, A. Prasad, June, p. 36
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41
Lock impact strength into PVC parts, M. Labovitz, October, p. 53
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36

124. Tensile Properties

Controlled stretching upgrades EVA films, I. O. Salyer, H. P. Holladay, and R. G. Olt, February, p. 39
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32
A fluorocarbon that's melt extrudable, D. B. Allen, J. R. Perkins, Jr., J. C. Reed, and E. W. Fasig, October, p. 48

125. Testing

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Dynamic mechanical testing of polymers, G. P. Koo, May, p. 33
Know all your molding variables, E. O. Allen and D. A. VanPutte, July, p. 37
Effective quality control for the plastics industry, Ontario Section, August, p. 82

126. Thermoforming

SPE's 32nd ANTEC, PE Staff, April, p. 27
A three-in-one thermoforming machine, B. Procter, July, p. 26

127. Thermoplastics

Reconsider liquid coloring for plastics, H. U. Hackney, March, p. 61
A coated asbestos with better coupling, F. H. Ancker, R. G. Azrak, and M. D. Bertolucci, July, p. 32
Fibrous plastic webs without spinning, H. G. Schirmer, August, p. 62
"Elastomers" based on PVC, J. T. Lutz, Jr., September, p. 41
What every molder of PMRN should know, S. R. Melvin, October, p. 28
Producing parts precisely to size starts with realistically designed tools, J. G. Comparin and R. G. Green, November, p. 36
Engineering resins primer, PE Staff, December, p. 17

128. Thermosets

Thermosets in the mid-70's, Philadelphia Section, January, p. 54
SPE's 32nd ANTEC, PE Staff, April, p. 27
Thermoset injection molding has come of age, S. H. Bauer, April, p. 64
Designing inlet channels of thermoset injection molds, D. L. Messenger and R. S. Papoojian, September, p. 38
Engineering resins primer, PE Staff, December, p. 17

129. Time Dependence

A guide to better testing of plastics, M. N. Riddell, April, p. 71
Compounding the tough ones?, R. L. Adams, October, p. 35

130. Toxicity

Plastics, the law, and you, Plastics Engineering Staff, March, p. 17

U

131. Urethanes

Engineering resins primer, PE Staff, December, p. 17

V

132. Vinyls

Recent advances in extrusion technology, Newark Section, January, p. 55
SPE's 32nd ANTEC, PE Staff, April, p. 27

133. Viscosity

Viscosity the way you want it—sooner and later, G. E. Forsyth and F. J. Ampthor, June, p. 41
Powdered nitrile rubber—a versatile plasticizer for PVC, M. E. Woods and D. G. Frazer, November, p. 26

Authors' index

Numbers refer to category headings in Subject and title index. i.e., 76, see Physical Properties

A

Adams, R. L. 13, 18, 36, 83, 110, 129
